Rev. and Mrs. G. D. Coffey, of Prospect, were visitors in the home of C. W. Smith this week.

Mr. Burke is also recognized as an authority on Appomattox history, and by every standard one of the county's most prominent citizens.

Before they got to the polls on Monday, the voters of Appomattox had several important facts to consider, says John R. Hutchinson, county director of extension.

The first big fact is that our former large export market countries have placed high tariffs and quotas against our wheat.

Second, world prices of wheat are materially lower. Our wheat growers have kept us on a domestic basis, unrestricted production.

Third, there is still enough wheat available to produce bumper crops and surpluses.

Fourth, domestic consumption of wheat is relatively constant. Exports are being made to improve the quality and appeal of bakery products.

Fifth, farmers are protected, their domestic allotments, against the world export prices.

Sixth, the drought, while solving some of the immediate surplus problems, has not changed the fundamental causes of the wheat problem.

Seventh, there is still enough wheat available to produce bumper crops and surpluses.

Eighth, domestic consumption of wheat is relatively constant. Exports are being made to improve the quality and appeal of bakery products.

Ninth, farmers are protected, their domestic allotments, against the world export prices.

Tenth, the drought, while solving some of the immediate surplus problems, has not changed the fundamental causes of the wheat problem.

Eleventh, there is still enough wheat available to produce bumper crops and surpluses.

Twelfth, domestic consumption of wheat is relatively constant. Exports are being made to improve the quality and appeal of bakery products.

Thirteenth, farmers are protected, their domestic allotments, against the world export prices.

Fourteenth, the drought, while solving some of the immediate surplus problems, has not changed the fundamental causes of the wheat problem.
